Introduction

The methods I'm going to teach you is somewhat consider Blackhat, but then this is 100% workable. Because I really did make money from it, else I would not spend time and effort writing this guide to help you. I mean, why the hell would I waste time on writing stuff that not workable! I can invest the time in more profitable ways! You got me?

Ok, so in this guide, I will teach you how to get start with your PPI Adventure. And you can use whatever method you are most comfortable with from my recommendation. And by the way, I have seen people selling these methods separately on many forums. They usually sell for \$20-100, and yes people do buy them but I am offering them all for free to a limited to the community and you can give off this guide to your friends and loves on too. The only condition is you are not allowed to modify any part of the content in this guide. All I ask is that you sign up using my referral link.

To get start, you must first sign up from PPI Companies. They are many of them in the internet, but I'm going to introduce to you 2 PPI Company only.

[Sign Up For LuxeCash Here](#)

[Sign Up For OXOCash Here](#)

I once more recommend using luxecash. I consider this the best PPI company in my opinion, they payout on time. And I have never had any problems with them. However, OXOCash is great for music album and you can mass create them and their torrent life span is usually higher, but to use this effectively, you must get a seedbox.

I do not like the PPI scene. By this I mean most the forums, mostly anyone on them on a daily basis are struggling with this method. And basically are lost. This method works I can guarantee it. If you follow my steps you will be making \$20-100 a day on a daily basis. It might take a bit of your time to start, but once you do and have everything running nice and smooth. You will see results almost instantly. But like I said you have to do the work, this is not a get rich quick scheme. If you ever have any problems feel free to contact me, on the forum I pm you. I will eventually get a contact form.

Well than might I add good luck with your PPI adventure, I hope you too find the golden treasure.

Signing up for PPI

For a start, I recommend you to sign up BOTH of the company. Reason, both company have their own strength. You will start to understand it when you login into your user interface and signing up take less than 5 minutes of your time.

As I mention, please sign under my affiliate links, because you have nothing to lose even thought u signing up from my affiliate links. You won't get a single cent lesser from it. Another reason is that I will only provide help and support for you if you are my affiliate. I will have to verify you are my affiliate before I will help you.

I mean this is fair right, I created this guide for you and writing down all my knowledge that I take me time to learn, compress it and make this a Step by Step Guide. Future more, I'm giving help and support if you need help. All I ask is to sign up under me.

Tutorial

I will be teaching you 3 method of disturbing your files. To get started, search for popular file and bind them with the EXE. Make 8 torrents to kick start your success. I started with 8 torrent with a lousy connection and made money from it. So can you !

Method 1: Torrent Method (Recommended)

Method 2: P2P Method

Method 3: Music Album Distribution (Recommended)

For This PPI Method to work, you will have to follow these 5 Simple Steps.

YES! Only 5 steps and you can make recurring revenue daily while you are sleeping

Step 1: Torrent Creator/Uploader

Step 2: Downloading Application/Sharing Files

Step 3: Binding

Step 4: Making Torrents

Step 5: Uploading to Torrent Sites

Method 1: Torrent Method

Step 1: Find the files you want to share

This is the most important step and is very critical in your success. You must find POPULAR Applications! You won't get any success if no one is downloading your files. But don't worry, just do some research and you can find popular files easily.

You can use applications or Games(larger files) depending on your connection. Here are a couple links to help you find some of the more popular ones. Some common mistake that people make is that they choose a big that is too big yet their home internet connection is slow. Note, this will cause you to limit your earning because you have problem uploading Hugh file. Larger file works fine with Seed Box, but if you have slow connection at home, choose a smaller file size instead

<http://thepiratebay.org/top>

<http://www.mininova.org/today/>

<http://www.download.com> (Very useful as they have top 50 lists")

www.google.com

Search Engine is very easy to use, just type in the keyword and you get hell lot of result

Example: Popular Files, Popular application, most download etc etc

And yes, that all with Step 1.

Kinda easy right? I'm sure you have lots of experience in downloading stuff ^^

Step 3: Binding (Part 1)

So the next question is how do I combine my EXE files with my application that I want to share ? The answer is binding

First let me explain what binding is. We download the .exe file from luxecash/oxocash. And merge it with another application using iexpress.

For Luxecash, you can find the exe by going to the "installation Files" page click "Request installation file" and download the exe install file to your desktop. Do not click it or you will get infected. Otherwise the file is safe unless clicked by the user. If your antivirus detects the file as being a virus and automatically deletes it you have to disable you antivirus, or find some way around it so it does not delete the file automatically.

Members Area / Installation Files

In order for us to be able to track the installations you perform, you need to use an installation file which is tagged with your Affiliate ID (and, optionally, Tracking ID if you want to track installs for each of your sites individually). The tagging of the installation package is done automatically, so in order to get the installation files, you just need to specify Tracking ID (optional) and request them, by clicking the Request Install Files button below.

The installation files are available as .exe

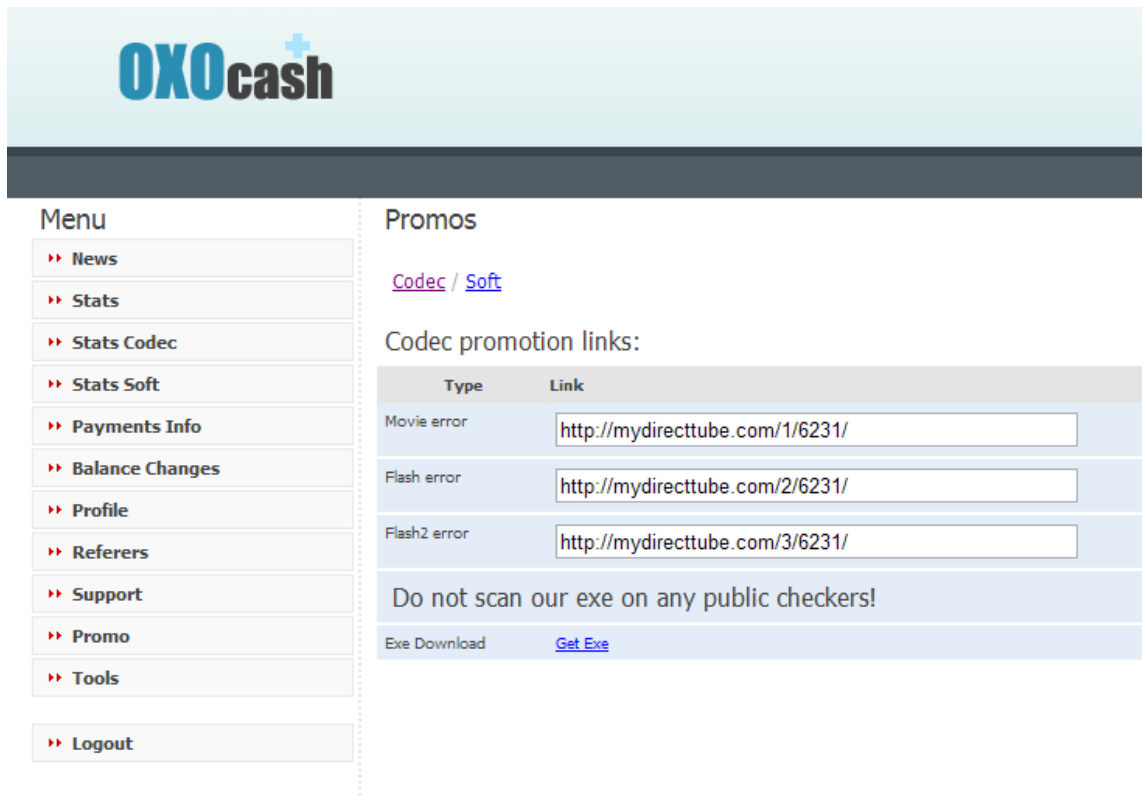

The status of your requests can be seen below. If you have problems with your Installation Files downloading, please contact your affiliate representative.

Date requested	Affiliate ID	Tracking ID	Detailed
2008-08-11 04:36:12	161949	N/A	Download installation files

For Oxocash, you can find the exe by going to the “Promo” page which is located on the left side after you login. Click on “Exe Download Get Exe” Do not click it or you will get infected. Otherwise the file is safe unless clicked by the user. If your antivirus detects the file as being a virus and automatically deletes it you have to disable you antivirus, or find some way around it so it does not delete the file automatically.

The screenshot shows the Oxocash website interface. At the top left is the Oxocash logo. Below it is a dark grey navigation bar. On the left side, there is a 'Menu' section with a list of items: News, Stats, Stats Codec, Stats Soft, Payments Info, Balance Changes, Profile, Referers, Support, Promo, Tools, and Logout. On the right side, there is a 'Promos' section with links for 'Codec' and 'Soft'. Below that is a section titled 'Codec promotion links:' which contains a table with three rows of links. The table has two columns: 'Type' and 'Link'. The first row is 'Movie error' with link 'http://mydirecttube.com/1/6231/'. The second row is 'Flash error' with link 'http://mydirecttube.com/2/6231/'. The third row is 'Flash2 error' with link 'http://mydirecttube.com/3/6231/'. Below the table is a blue banner with the text 'Do not scan our exe on any public checkers!'. At the bottom of the promo section is an 'Exe Download' link labeled 'Get Exe'.

Type	Link
Movie error	http://mydirecttube.com/1/6231/
Flash error	http://mydirecttube.com/2/6231/
Flash2 error	http://mydirecttube.com/3/6231/

After you have gotten your EXE file, let move on to Binding

Step 3: Binding (Part 2)

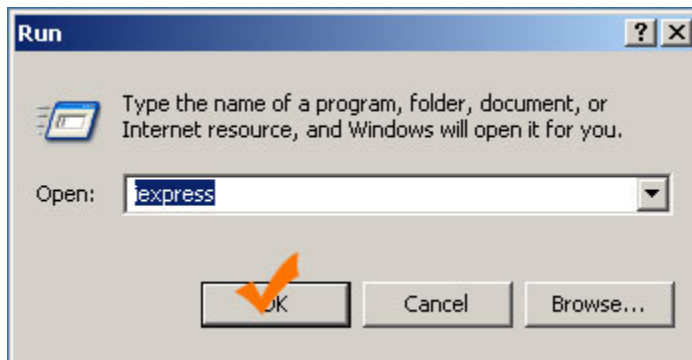

For binding we will be using the windows binder iexpress (It's already built-in Microsoft). If you not operating on other operating system, you will have to search for binder yourself, go to www.pay-per-install.org and ask the pros there.

There are also a couple forums where people offer binders for around \$20-30. I myself purchased one but I personally did not like it. Using iexpress is really easy and quick once you get the hang of it.

So let's start. This is a 15 step process; it can be done in under a minute once u gets the hang of it.

Step 1.

Goto>StartMenu>Run>type "iexpress"

Step 2.

Click Next, do not change anything.

Step 3.

Click Next, do not change anything.

Step 4.

Type in anything, and click Next. The title will not be displayed by the user since no iexpress window will be open by the user.

Step 5.

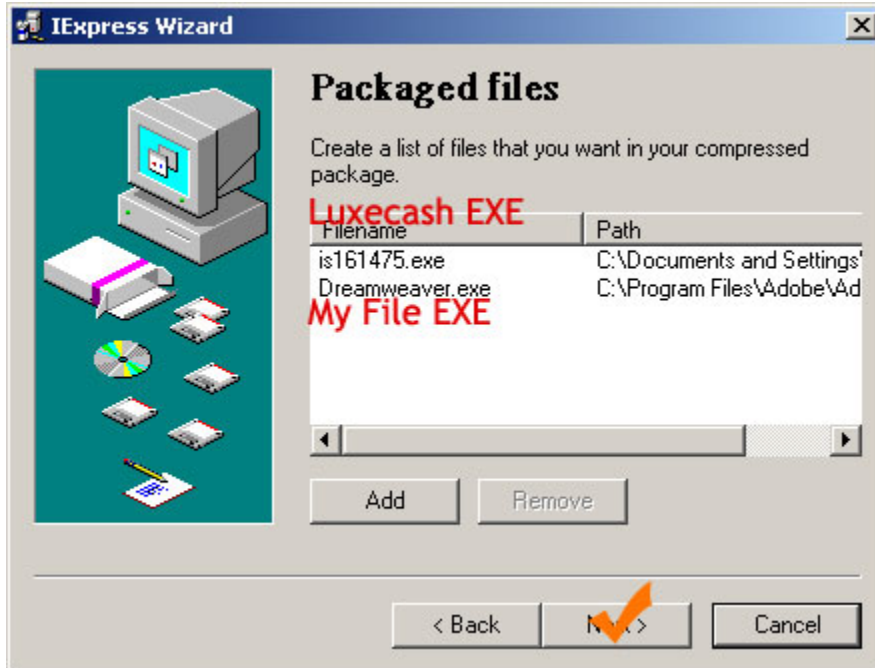

Click Next, do user does not want to be prompted with anything.

Step 6.

Click Next, we do not want the license to be displayed.

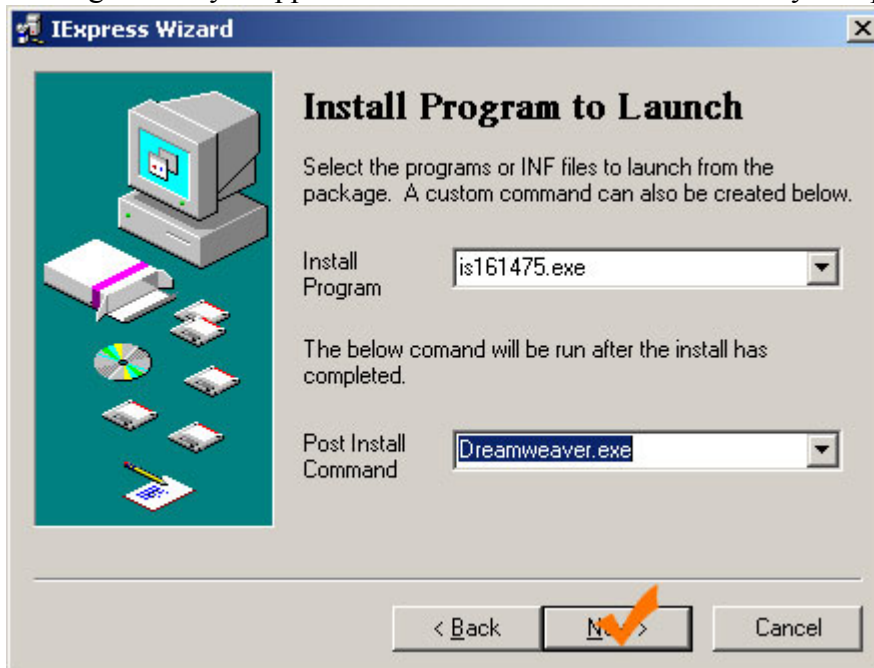

Step 7.

In this step add both the .exe the one from the application and the one from luxecash you downloaded previously.

Step 8.

Select "install Program" as your ppi .exe and "Post Install Command" as your application .exe

Click Next.

Step 9.

Leave default settings. Click Next.

Step 10.

We do not want to display a message click next. Although I will explain in another method how this could be usefull.

Step 11.

Select the location where to compile your exe. I usually select the desktop and rename it to the applications original file name. Click Next

Step 12.

Select "no restart" Click Next

Step 13.

Select "do not save" not usefull to us. Click Next

Step 14.

You have finished that "Long" process, trust me you will get used to doing it after a couple times. And than you will whizz through it. Click Next

Step 15.

The package was created. Click Finish.

Step 4: Making Torrents

First, move your exe into the folder of your existing .exe you downloaded. Replacing it with the new one. You can rename the folder to what you want. This will be the torrent name.

Now we have our exe created. We want to create a new torrent so we can begin to upload. This is a easy 6 tip process

Step 1.

Open uTorrent. Select "File" > "Create New Torrent"

Step 2.

Select "Add Directory" add through folder of your bundle.

Step 3.

In trackers, enter these trackers in the box, Copy and paste.

<udp://denis.stalker.h3q.com:6969/announce>
<http://www.sumotracker.com/announce>
<http://pirates.sumotracker.com/announce>

Step 4.

Select "Start Seeding" and "Click Create and Save As" save it to your desktop in a folder and call it something random. This will contain all the .tor files you are uploading.

And that's done, Simple aren't it

Step 5: Uploading to Torrent Sites

There are various torrent websites you can upload to. The two main ones are [Mininova](#) and [TPB](#) of course. And will get you the most downloads. Here are a couple more that work well.

Here are the Rules of Uploading

Rule 1: Do Not upload too many torrent at a time

Rule 2: Do Not use the same IP to upload the torrent

Rule 3: Do Not use the same account to upload torrents

The best is 3 Torrents per IP Address/Account.

Reason? To prevent your IP Address/Account to get banned from torrent site resulting in all your torrent seed being deleted. This will ensure that you will have your torrent seed alive in the torrent

So, there are 3 ways to achieve this

Way 1: Changing IP

Way 2: Using Proxies

Way 3: Outsource

Way 1: Changing IP

You will need to find ways to change your IP address. I have no problem changing my ip address, every time I reconnect my connection; I just get a new IP address. You can try this out too.

Here some resource to use change your IP address

<http://www.pay-per-install.org/general-discussion/298-howto-change-your-ip-mac-linksys-router.html>

<http://www.pay-per-install.org/2210-post4.html>

Way 2: Using Proxies

I never use this before so you have to find your ways, do a google search or get your answer from forums. You can also ask question from www.answer.yahoo.com

Way 3: Outsource

This is great, outsourcing your torrent uploader is very convenient if you have the resource. The pricing is cheap too. You can find many people who offer their service here

<http://www.pay-per-install.org/buy-sell-trade/>

Here are some Great Up loaders

<http://www.pay-per-install.org/buy-sell-trade/1290-torrent-uploading.html>

<http://www.pay-per-install.org/buy-sell-trade/1819-torrent-uploading-services.html>

Method 2: P2P Method

The world of p2p is larger than it has ever been. Imagine every single file you were sharing that you were making 10 cents. That has to add up, especially when you start sharing millions of files. Imagine how profitable you could be. Well let me show you how. I have created this step by step guide

Step 1 Finding a P2P Client

Find a good p2p client, one that you are most comfortable using. And one that is popular. I recommend you try Limewire, Shareaza, Frostwire, or Ares. Maybe use them all? Depends on if you pc can support them all.

Step 2 Obtain a copy of Winrar

Get a copy of [Winrar](#) and now we can finally begin. Google it and you will find the installation file.

Step 3 Download Applications

Same as the torrent method, scroll up and you will see it.

Step 4 Creating SFX packages in Winrar

Create SFX packages using your fake applications or the original applications you download, include the luxecash/oxocash installation file in this process. Make the SFX package open the luxecash/oxocash install file before your piece of software. This will make sure that every time the user downloads and clicks your application, you will receive 10cents or more. Most people also keep sharing your files after downloading, which will result in more income over time.

You now can bind as many applications. The benefit of SFX files is that you won't limit to sharing of application file. You will be able E-books/music/video too. Just create the SFX archives and bind with it. Remember the more you have shared the more downloads you will receive. And the more profit you will begin to see.

Here how to create your SFX archive
right click the files/folder
click add to archive
under archiving option, choose "Create SFX archive"
then bind it with your EXE

Lastly, I would not recommend you to use this method unless you are very pro in it because it didn't have any success for me. Instead, I can seed result immediately when I using the torrent method. Now, I only use the torrent method.

Method 3: Spreading MP3 Album

Do you guy remember that I say Oxocash is good for music album?
Because you can hide Oxocash files in music album!
Here is step on how to archive it

Step 1: Register in this forum → <http://mp3codec.info/forum/index.php>

Step 2: Download the tools MP3 Codec Kit and FilePadder

MP3 Codec Kit → <http://www.mp3codec.info/tools/mp3codeckit.zip>

Automatic the process of binding the file into the music file. This codec will do it for you.
Simple yet fast. So you won't need to download the EXE from oxocash.com

FilePadder → <http://www.mp3codec.info/tools/filepad.zip>

This will software helps to increase the size file of the music file to make it look "real"

You can find the file here <http://mp3codec.info/forum/viewforum.php?f=11>

And Here is the step to use Codec Kit

Step 1) Open MP3 Codec Kit

Step 2) Type in your 4 digit Affiliate Number from OxOCash

Step 3) Click the Open button

Step 4) Find 0000.mp3 (Click OK 😊)

Step 5) Click the Save button and save it as xxxxx.mp3

Step 6) Close MP3 Codec Kit

Here the step to use FilePadder

Step 1) Open the xxxxx.mp3

Step 3) Enter the Bytes to add in (2000 will add 2000 bytes, not kilobytes. Have to put in 2,000,000 to make it 2 more megabytes)

Step 3) Remove the 2 in xxxx.mp32 and rename it to xxxx.mp3

Xxxx= Your music file names

Step 3: Hide the "Codec File" Together with your album and change the properties

Just right click on the properties and update all the information to the xxxx.mp3.

Then delete away the original and place the fake one into it. Make it as real as possible.

So how do you check if you have success created? Just run the xxx.mp3 run, you will notice a pop up will come out saying "MP3 format not support, need extension or something". Don't not click Yes. If this come out, that mean you have succeeded.

FAQ

This section will get updated with some of the more common questions that I receive.

Q: I have posted some torrents and my Account on Luxecash is still showing \$0. What did I do wrong?

A: Luxecash has a delay of around 12 hours. If no installs show up after 24 hours, you've likely bound the files incorrectly

Q: What do I upload to the Torrent sites?

A: Upload the .torrent file you created!

Q: Luxecash is asking me which method you will use to distribute the file. What should I tell them?

A: reply them by Torrent and P2P.

Q: Is there a way so that I don't have to on my PC 24 hour?

A: Yes, get a seedbox and it will do the job for you 24hour everyday

Q: What is seedbox ?

A: Scroll down to the resource and I will explain to you

Q: Does seedbox really increase my income?

A: Yes, of course! The earning potential can increase to 1000% +. No joke

Background

And congratulation! You just finish my Step-By-Step Guide. This guide is written from my experience and this is 100% workable as long as you started it.
YES ! START IT, TAKE SOME ACTION.

Here is a screen shot of my earning in LuxeCash a week. Just \$0.01 more and I make it to \$50. Well, this amount is indeed very little, I know. But let hear my reason

Reason 1: I register successfully on Aug 12 and using this method I uploaded 1 torrent

Reason 2: I uploaded **only 8 torrent** using Same Account/Same IP to torrent site on August 13th at night.

Reason 3: My internet connection sux, my max speed is only 30/s

Reason 4: Since then, I never **touch any of my PPI** except doing some advertisement in digital forums. So you might want to ask, why I don't do more of it. Because during that week, I was having a Major Exam! YES, MAJOR! AND I HAVE TO STUDY FOR IT!

And I was only free from exam on Aug 28 and I created this guide for you guyz. My upcoming plan is to create 30 album using the music distribution and upload them once I get my torrent/files ready. Then wait for money to roll in ☺

Resources-Seed Box

So what is this seedbox I have been mentioning?
Here is what Wikipedia Say:

A **seedbox** is a private dedicated server used for the uploading and downloading of digital files. Seedboxes are plugged in to high speed bandwidth networks, often with a throughput of 100 megabits or more.

The ability of a seedbox to transfer files so quickly is one of the big attractions seedboxes hold within the P2P community, and within the BitTorrent community in particular.

Because of the mentioned high speeds, seedboxes tend to be extremely popular inside private torrent trackers, where maintaining a ratio above 1 is very important. These seedboxes also serve as a kind of proxy, because a user's actual IP address is not shown, the server's one being shown instead

So let summaries, Seedbox is an online server which will seed your torrent 24/hours every day with high speed. 24hours daily and high speed connection. That's all you need to know.

Getting a SeedBox is a must if you plan to achieve at least \$20 daily if you PC do not have good connection and you never on your PC for 24 hours. Let the seedbox do the entire seeding job while you are sleeping

Here is a great SeedBox company I'm currently using. I done a thoroughly research and I found this is the best. They are offering Unlimited Download and Uploaded Speed which mean Unlimited Bandwidth.

SeedBox Company → <http://www.1click-hosting.com/whmcs/aff.php?aff=003> (Please register from this url)

Click the "Seedbox" on the top right hand. They have a couple of plan available and I would recommend TF-Huge for a start which cost around \$20 USD. After you have purchase the plan, you will need to wait 1 day or 2 for them to get your torrentflux set up. You will receive your hosting account first, but you can ignore it, because you only interested in the seedbox account. They will mail to you when they have set up. In the meantime, find album or application and get them ready

Here a screenshot of the seed box user interface

Select a Metafile for upload → for download of torrent

URI for the torrent file → Same to download file, but I never use before

URL for the File to wget → Same to download file, but I never use before

So you have your seedbox, next you will need to upload your files into the seedbox., I will explain to you on the next page

Resources-Uploading Files to Seed Box

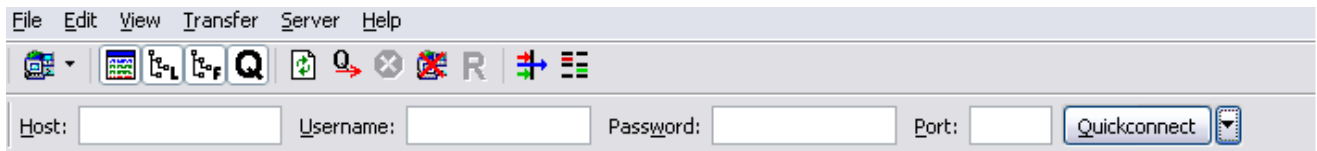

After you register with the company, they will send you a email regarding your account. They will also give you the password for FTP server

FTP allow you to have direct connection to transfer file between you PC and server

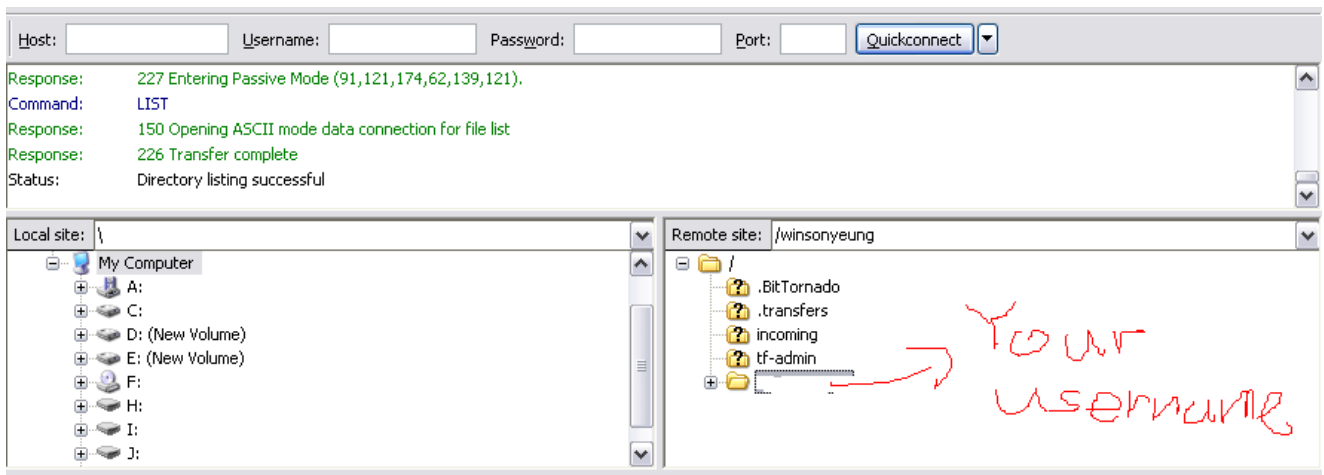

You will need to download a FTP Software, the software I'm using is FileZilla

Download FileZilla here → <http://filezilla-project.org/>

Login to you FileZilla using the detail you received from the email from the torrentflux

After you have login, just throw all the folders you want to upload into your “username”

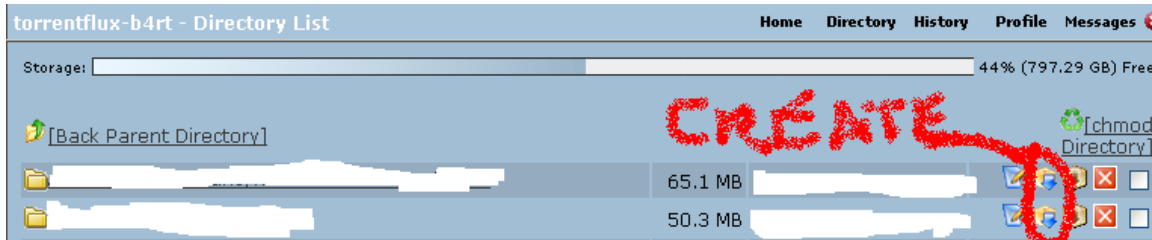

The Uploading process is completed! Next, let's move to the Creating Torrent

Resources-Creating Torrent From Seed Box

Quick Money

Well, I know that some of you would love to get a seed box to start off the PPI adventure. But you might not have the money to purchase it.

So I guess I will include the “Quick Money” method here to help you get your capital needed to invest more tools on PPI

This method is simple and there is a great demand for it in the PPI world too.

Uploading of Torrent for others!

But for this to work, you must be able to change your IP address or you know how to use proxies.

Register an account in www.pay-per-click.com and click a thread under the Buy/Sell Section. Offer your service of uploading torrent can charge them a fees.

Many of the newbie who have no money to invest in tools are using this method to get the capital. You can too !
